Agrocrops Commissions Advanced Dry Chilli Processing Facility in Guntur (India)

Agrocrops Spices Private Limited has commissioned a new dry chilli processing unit in Guntur, upgrading operations with enhanced food safety standards and automation. The facility employs nearly 600 women workers, promoting inclusive growth through structured conditions, daily wages, safety provisions, and welfare benefits beyond local practices. Designed with sustainability in focus, the unit emphasizes efficient resource utilization, reduced wastage, and responsible sourcing. Equipped with high - capacity processing for stemless chilli, automated seed cleaning, machine stem cutting, and colour sorting, it also includes in - house bag manufacturing. Sourcing directly from farmer markets, Agrocrops serves domestic and export markets, with HACCP, Halal, Kosher certifications and Sedex, BRC, Global G.A.P. underway.
